

Release Notes

Cognex Designer 4.5.0 is a release which includes the following new features

- Added HTTPS and iFrame support for WebHMI
 - Enables embedding the WebHMI within an external HMI product
- Included Coordinate space tree support for the WebHMI Display
- Added MQTT Communications Device
- Additional Sample plugins have been added as examples of how to extend Designer
 - VisionPro ToolBlock Scaler Component
 - Create a single Master ToolBlock which can be used as a template to generate multiple independent instances of that ToolBlock.
 - Example Custom Camera Device
 - Additional sample Blocks
 - Camera Configurator Block
 - Custom Styled Block
 - Dynamic Input/Outputs Block
- Options to speed up project loading (experimental)
- Tool Edit Controls can now be used with VisionPro 9.21 EL tools (Classify, Segment, OCR)

** Tested to work with **VisionPro 9.21**, **VPDL 3.3** and **VisionPro 9.21 GPU Supplement**.*
